

SOLUTIONS CONSULTANT / AI • SECURITY • CLOUD • SOFTWARE

Flynn Chambers

flynnchambers@gmail.com / +61 411 679 512 / Brisbane, QLD / [linkedin.com/in/flynn-chambers-tech](https://www.linkedin.com/in/flynn-chambers-tech)

PROFILE

Solutions consultant and engineer who works end to end on projects: scoping and selling technical solutions to customers, then designing and building them. Comfortable across infrastructure, cloud, and security, with a particular focus on AI and full-stack software development, and equally at home in a stakeholder meeting or a build session. Master of IT in Cybersecurity, with a track record of developing tools and systems that solve real operational problems. Looking to focus primarily on AI while drawing on my experience across the other verticals.

EXPERIENCE

Solutions Consultant, Smile IT 2026 – PRESENT

BRISBANE

- Scope and sell technical solutions to customers, running discovery and stakeholder meetings and translating their requirements into infrastructure, cloud, security, and AI projects.
- Own solutions end to end, from initial conversation through to delivery, ensuring what is sold is what gets built.
- Deliver hands-on project work across infrastructure, cloud, security, and AI.
- Designed and built the company's internal quoting tool end to end: a full-stack application containerised with Docker, exposing its own REST APIs and an MCP integration to plug into AI workflows.
- Develop internal tooling and automations in TypeScript and Next.js to streamline delivery and embed AI into the team's workflows.
- Designed the pricing matrix that drives the team's quoting.
- Built out Smile IT's AI consulting offering, shaping the service, its positioning, and its go-to-market.

Systems Engineer & Service Lead, Tribe Technology 2024 – 2026

AUCKLAND

- Led service delivery for 20+ enterprise clients, owning escalations and maintaining consistent standards across the client base.
- Deployed AI agents and automation into client environments, including cross-tenant identity synchronisation.
- Rolled out security tooling across the client base: endpoint protection, awareness training, and threat monitoring.
- Produced clear, branded technical documentation for clients and internal teams.

Co-Director, Nhabit Ltd 2021 – 2024

CO-FOUNDER

- Co-founded a 3D architectural SaaS, growing it to \$20K MRR before winding down.
- Built and owned the full-stack infrastructure and a secure, cloud-based MVP on Azure.
- Translated technical detail into business value for boards and investors.

Trainer, Techtorium 2023 – 2024

AUCKLAND

- Taught 50+ students core IT: networking, virtualisation, cloud, and security.
- Developed tailored course material that improved pass rates by 87%+.

IT Support Engineer (L1–L2), Intellium 2023

AUCKLAND

- Handled 18–24 daily tickets across software, hardware, and network issues while holding SLAs.
- Implemented fixes that reduced recurring issues and improved client security posture.

EDUCATION

Master of Information Technology - CS, Whitecliffe College GRAD. JUL 2025

DISTINCTION

- Thesis: Argus - an AI-powered XDR alert triage system.

Level 7 Diploma - Cloud Management, Techtorium NZIIT 2022

- Professionalism Award and Excellence Award.

SKILLS

- **Consulting:** Solution scoping, stakeholder management, technical pre-sales, quoting & pricing, proposals and SOWs.
- **AI:** AI consulting & strategy, building MCP servers, LLM tooling, agent deployment, local LLMs, routing, API integration.
- **Development:** Full-stack React, TypeScript, Next.js, Docker, REST APIs, MCP servers, Cloudflare, Firebase, SQL, and PowerShell automation.
- **Cloud & Infrastructure:** Azure, Entra ID, Microsoft 365, Windows Server, VMware, Hyper-V, Intune, networking (TCP/IP, DNS, DHCP).
- **Security:** NIST, ISO 27001, CIS, Essential 8, identity, endpoint, and cloud security.
